PASSENGER ASSOCIATION. Report That the Trans-Continental is An Assured Fact.

Denver, Sept. 3 .- A special to the Resublican from Glenwood Springs, Colo.,

According to all reports the Trans-Continental Passenger association is now an assured fact. The general passenger agents who have been in session here since last Thursday morning concluded their labors this afternoon, and the results thereof go to the presi-dent and managers of the respective lines who will meet in New York City Sept. 18. There appears to be no doubt in the minds of the agents that their work will be ratified by their superior

The scope of the organization covers an all-passenger traffic west of the Missouri river, destined to California points only. The business to the northern coast points will not be covered by the association, although it is be-lieved that railroad lines leading to the north will later come into the or-ganization. None of these lines were represented at this meeting.

The question of the handling of

handling of troops will remain in statu quo for a time at least. No definite conclusio was arrived at concerning this point which has occupied more time and attention than all the others combined The leaving of the military matter in this shape is due to the continued and persistent opposition of the Santa Fe. The next meeting of the passenger agents will be held in Chicago some time during October. Meanwhile the executive committee, consisting of E. E. L. Lomax of the Union Pac Sebatsian of the Chicago, Rock Island & Pacific, Chairman McLeod and Sec-retary T. Thompson of the Western Passenger association, will have charge of such work as can be done. The as tll after the meeting in October, association will be an independent and the officers thereof will be chosen at the Chicago meeting, Oct. 14. watched with considerable interest There is much complaint from pack ers about the quality of the range catvery uneven and every bunch coming to the yards here needs lots of sorting before they can be offered and the per-centage of well fatted steers is decidedly low. It is remarkable what a difference there is in the same brand of cattle from the same range. Some will be in good shape but more in bad flesh, and very few can be called "fat." Stockmen say that the condition is due to the drouth and scarcity of water. The few well fleshed cattle are those that happened to find a place where there was water and grass and remained a that place.—Denver Stockman.
